VULNERABLE VERSION

New vulnerabilities are continuously found for jQuery, lodash, Angular and other libraries. Monitor these libraries to protect your web application.

Stay up to date on CVEs by connecting your project to Snyk to receive automated notifications & fixes.

Security headers

HTTP security headers enable better browser security policies.

Successfully detected the following security headers:

- √ strict-transport-security
- √ x-content-type-options
- √ x-frame-options
- √ content-security-policy
- √ x-xss-protection

Report a new vulnerability
